ACOUSTIC TRATMENTS FOR INDOOR ENVIRONMENTS

FORM MEETS SUBSTANCE: DESIGN SOLUTIONS FOR YOUR COMFORT

Isospace is a brand by Tecnasfalti Isolmant, a company that has been in the insulation industry for more than 40 years. The Isospace range includes unique products that deliver acoustic comfort while meeting design requirements. These solutions have excellent sound-absorbing properties, are highly customizable and can be integrated into any environment with style and personality.

A CUSTOMER-ORIENTED APPROACH

ISOLSPACE IS CLOSE TO YOU

Isospace is a trusted partner that supports its customers at every stage of the purchasing process: from designing the most suitable solution to standard and customized production.

RECYCLED MATERIALS FOR ENHANCED WELL-BEING AND SUSTAINABLE DEVELOPMENT

SUSTAINABLE COMFORT

At the heart of our solutions is a **special fiber** called **ISOLFIBTEC**, a totally non-toxic and non-allergenic fiber that can be applied visibly in any environment. In addition to being water-repellent, it helps prevent buildup of dust, mites and moisture and can be handled without any protection. Isospace solutions are also thermally bonded, so they are free of any phenolic or formaldehyde binders. ISOLFIBTEC is a **sustainable** and environmentally friendly material: the fiber is obtained from pre- and post-consumer recycled materials.

THE SOLUTION

STYLE

The only one-of-a-kind sound absorbing panel that transforms the way you want, thanks to virtually endless customization options. You can use the panel in its **Black&White** version leaving the white or black fiber exposed, print personalized images and photos on the **Original** version or choose the **Pantone®** variant with its infinite range of colors. Give your walls a unique look by using standard formats or made-to-measure cuts and enjoy a true work of art that ensures the greatest possible acoustic comfort.

THE SOLUTION

STYLE FRAME

Style Frame is the great new product launched by Isospace! The customizable Style acoustic panel becomes a veritable canvas, to blend into any type of environment. Made with a rigid core, it is covered with printed fabric on the entire visible surface, including the edges, thus meeting specific taste and application requirements.

THE SOLUTION

STYLE MAFRIC

Style Mafric is an acoustic panel that embraces the concept of circular economy to eliminate all waste and give new life to materials that would otherwise be discarded. Indeed, Mafric panels are finished with wax cotton canvas recovered from the production waste of the eponymous clothing brand that works with social tailors in Italy. An original, unique and upcycled limited edition collection.

ACOUSTICS AND CONVENIENCE COMBINED

SKY

Sky is an acoustic panel made of ISOLFIBTEC fiber that is perfectly suited for quick and easy installation in modular false ceiling frames. Lightweight, convenient and customizable, it is available in white, black and mélange grey, but you can choose any Pantone® color and design your own checkerboard to give an extra twist of character to any room.

INDUSTRIAL CHIC STYLE

INDUSTRY

Isospace Industry is particularly suitable for industrial environments, including diffuse or semi-diffuse sound field applications, as it is designed to provide high sound absorption even at very low frequencies. Available in anthracite grey and ice white, with two thickness and three size options, it guarantees long-lasting performance.
